

RECLAIMED SPACE

sustainable living, delivered.

We, at Reclaimed Space, work to counteract the environmental impact of new construction. By using reclaimed materials from homes with historical or architectural significance, we create living spaces that are both beautifully designed and drop-ready.

Our most recent acquisition was the Shiner Livery Stable, located in Shiner, Texas, which was said to be one of the oldest structures in the area, built in the 1880s. The amount of amazing lumber is overwhelming. It has been a chore, but well worth the efforts. There will be some lucky Reclaimed Space owners with quite a story to tell.

The Reclaimed Space model is as local and sustainable as possible; from de-constructing abandoned homes for rural towns, giving boy scouts projects to achieve Eagle Scout, removing a blight for the community, saving landfill space, employing local tradesmen and delivering a sustainably designed structure with a "positive footprint."

"RECLAIMED SPACE IS MAKING A VERY SAVVY STEP INTO AN IMPORTANT MARKET NICHE IN THE PREFAB HOUSING WORLD. AFTER ALL, WE ALL WANT TO KNOW WHERE OUR FOOD COMES FROM; WHY NOT OUR HOMES TOO?"

- SustainableCitiesCollective.com

"RECLAIMED SPACE COULD JUST BE THE FIRST COMPANY TO COMBINE RECLAIMED MATERIALS, PREFAB, AND EFFICIENTLY-SIZED HOMES ALL IN ONE PROJECT."

- Jetson Green

With over 25 years of building experience, our spaces are not just a product of function; they're built with a guarantee of unrivaled quality. Reclaimed Space is proud to deliver custom, masterfully built spaces for sustainable living ... anywhere. Each space is custom designed and built to meet the clients' needs. Owners are involved daily as their unit is built through to completion. Average price is \$115/sqft.
